

GAME LOG

Math games are an important part of the RightStart™ Mathematics program. Instead of flashcards or timed tests, games supply the necessary repetition for understanding and mastery in an enjoyable setting, providing a superior educational atmosphere. The lessons indicate which games to play. Additional games can be found in the *Math Card Games* book.

This Game Log provides a record of the games played and when they were played.

[illegible]

Games help you understand, apply, and enjoy mathematics.
